STOCK EXCHANGE INACTIVE; RAILS ARE QUITE WEAK

United States Steel, Harvester Company, Anaconda Copper, General Electric and Telephone Show Strength.

(BY MORNING JOURNAL SPECIAL LEADER WRITER)

New York, Dec. 1.—Leaders were uncertain or heavy at the outset of today's short and inactive session on the stock exchange, mainly in consequence of another reaction in rails.

Industrials were moderately unsettled with shipping and prominent specialties, but these reversals were almost entirely overcome in the last hour, United States Steel, coalers and motors leading a fairly spirited recovery.

United States Steel rallied a point from its low of 91 1/4. Harvester Company rallied three points from its recent depression; Anaconda Copper was firm and General Electric and American Telephone improved a point or more.

Hartman Corporation, one of the more obscure specialties, stood out by reason of its extreme weakness, losing ten points on a few sales. A steady tone prevailed at the close. Sales, 145,000 shares.

Actual clearing house loans expanded by almost \$264,000,000. Total reserves were \$152,000,000, the largest sum in many weeks.

Bonds were slightly lower on very small offerings. Liberty 4's sold at 97.76 to 97.80 and the 3 1/2's at 98.88 to 98.90. Total sales, par value, aggregated \$1,725,000.

United States bonds, old issues, were unchanged on call during the week.

CHICAGO BOARD OF TRADE.

Chicago, Dec. 1.—Prospects of a considerable enlargement of receipts next week had much to do today with declines in the value of corn. Prices, although steady at the close, were 1/4 to 1/2 cent lower with January 1918, and May 1917 1/2¢. Oats finished 1/4 to 1/2¢ down and provisions off 1/4 to 1/2¢.

Railroads appeared to be furnishing cars for corn a great deal more readily than has been the case of late, and receiving houses were encouraged by weather likely to improve the quality of the crop and facilitate shipments. Peace talk received some attention. Week-end evening up of trades.

lacked volume, and there was a noticeable absence of any important rallies.

Oats weakened, owing chiefly to abatement of car scarcity. Later prices recovered somewhat.

Sharp breaks in hog quotations carried down pork, lard and ribs. Buying increased, but the market failed to respond.

Closing prices:

TERRIBLE TOLL OF SHIPPING IS TAKEN BY WAR

Liverpool Steamer Owners' Association Reports Loss of 231 Vessels Since 1914; Money Value Is Half Billion.

(BY MORNING JOURNAL SPECIAL LEADER WRITER)

Liverpool, Dec. 1.—The Liverpool Steamship Owners' Association reports that 231 of its ships with a total tonnage of 1,465,946 are numbered among the war losses since August, 1914. The marine losses numbered thirty-three vessels with a total of 174,359 tons.

New vessels added to the fleet of the members of the association were 131 with a tonnage of 945,532. The association estimates the cost of replacement of liner losses during the war at \$103,500,000. After deducting \$59,000,000 as recoverable under insurance or from the state at ascertainment values under the terms of requisition, there was left a balance to be provided of \$44,500,000. In addition there must be a heavy outlay in reconditioning liner fleets as they exist when peace is restored. The report provided the whole of the money collected in respect of war losses is reinvested in shipping the lines would have to find out of earnings, out of further capital, or on credit, in order to bring back their fleets to the state of efficiency in which they were before the war, about \$147,000,000.

The report proceeds: "If the state embarks on the building of liner tonnage, the future of the lines must be gravely imperiled. The shipbuilding yard facilities for the building of such tonnage are limited, and if the ships are occupied by state ships, it will be impossible for the lines to replace their losses. But above all else, if the state is building ships to compete with the lines their credit with their shareholders will be destroyed, and such capital as they have available will be withdrawn to find more secure employment."

The questions raised in this memorandum are of pressing importance, as it has recently been announced that the state is starting on the building of liner tonnage. Plans are already in existence for vessels to carry about 10,000 tons dead weight at a speed of fourteen knots.

The association asked the government to guarantee that the business of the lines shall be restored to them after the war and that they be provided with steel for replacing the fleet.
